EDUCATION

2017-2021
B.tech (CSE)
CHHATRAPATI SHAHU JI MAHARAJ
UNIVERSITY (CSJMU KANPUR)

2017
12th (science)
SWAMI HARSEWANAND PUBLIC
SCHOOL (VARANASI)

SKILLS

- **Programming Languages** : javascript , typescript , c++ , java , python

- **Backend languages**:Node js , php

- **Framework** : Next js , react Native , express js , flask api

- **Api** : Rest api , Graphql api

- **Auth** : Auth0 (Google , linkedin , facebook , twitter etc...) ,

- **Web Techonlgies** : React-Js , HTML, CSS, Bootstrap, Material Ui, fluent UI, Reactstrap , Jquery ,Redux , react-query , react-virtualization

- **Tam Work** : SEO , Negotiation and Teamwork

- **Database** : Mysql , Mongo , Postgres

- **AWS** :EC2 instances , s3 bucket

SHASHI KANT
Full Stack Developer (MERN)

I am thrilled to express my sincere interest in the Full Stack Developer position at your esteemed organization. With over 3+ years of dedicated professional experience and a robust four-year background in coding, I have acquired a profound expertise in leveraging state-of-the-art technologies, with a particular focus on the MERN .

Throughout my career, I have made significant contributions to a multitude of government projects, including prominent initiatives such as the Cement Corporation of India, the Engineering Enterprise Project (EPIL), the EPMS, and the Common Service Center (CSC). Presently, I am deeply immersed in the development of Rozgar.com and the CSC resume portal, both of which are proprietary products of our company. These platforms seamlessly integrate with Nakri.com, providing innovative solutions to the job market.

Certified as a Full Stack Developer by Internshala and recognized for my proficiency in MySQL by HackerRank, I possess a comprehensive understanding of Object-Oriented Programming principles in JavaScript and Java. Moreover, my expertise extends to a diverse range of frontend and backend frameworks, including React.js, Next.js, Node.js , PostgreSQL, MySQL, and MongoDB.

My professional journey has been characterized by a steadfast commitment to excellence and a relentless drive to deliver innovative solutions. I am genuinely enthusiastic about the prospect of bringing my skills and expertise to your esteemed team and am deeply grateful for the opportunity to introduce myself.

Experience

09/2021 - Present
Value innovation labs , Noida sector 16
Full Stack developer

2021
Full stack developer internship

Enterprize level projects

CCIL (Cement corporation of India)
TECH STACK: React js , Node js , Postgres

- **Employee, File, and Leave Management System:**
Encompasses a comprehensive system for managing employee files and leaves within the organization.
- **File Forwarding and Approval Workflow:**
- Facilitates the seamless forwarding of files across multiple departments and levels, culminating in approvals from designated authorities.
- **Leave Application and Monitoring:**
- Employees can apply for leaves through the system, which also allows for the monitoring of leave records.
- **Module Development and Bug Fixing:**
- Significant efforts were dedicated to fixing bugs within the file management and leave modules, ensuring smooth functionality.

EPIL (Engineering enterprize project)
TECH STACK: React js , Node js , Postgres

It's very similar to above project but modififed version of CCIL. generally known as Engineering Enterprise project . but it includedes some other modules with the old one . like E-filing modules , Knowledge management module , DAK maagement , E-toor , Medical reimbursment . which was totally intiated by me from scratch . And in this projects i have created E-toor module and Medical reimbursment module . Knowledge management . Apart from that and except all that modules made by me i haved done fixing and enhancement , like in E-filling , Leave module ,, Dak module as well . Overall these all modules are currently in running state and used by government employees of EPIL . I have been working on this project since last 1.5 years .

- **Deployement** :Netlify and AWS , docker , Jenkins , Linux environment

- **Programming Concepts** :Data structure and algorithms

- **Additional Skills** :Docker , redis , linux , Elastic search , git

ROZGAR.COM (Job Portal , rozgar.com)
TECH STACK: Next js , Node js , Mysql
- Developed a project same as naukari.com, introducing unique functionalities.
- Successfully migrated 70,000 jobs from rozgar.com to the new platform, transitioning from MongoDB to MySQL.
- Implemented Next.js to improve SEO performance, aiming for better search engine ranking.
- Introduced AI-powered modules for generating resumes, summaries, and cover letters, enhancing user experience.
- Integrated Zoom call functionality and Grammarly for additional features and improved content quality.

HRMS (Human resource management system)
TECH STACK: React js , Node js , Postgres

it's also our own company's project bascailly a employee management system . where i have worked with payroll module .

EPMS (https://epms.icsi.edu/)
TECH STACK: React js , Node js

It's an employee management web app used by companies secretary of India ie. ICSI , In this project i have resolved some bugs and took care of some modules while doing some minimal changes .

Common service center (CSC ,https://csc.rozgar.com/)
TECH STACK: Next js , Node js , Mongo db , redis , Bull MQ

It's a government common service center which is reponsible for managing adhar cards and other government schemes . in which we (,Rozgar.com) colaborated for resume making module to this CSC portal . where i worked on authorisation part for the CSC employee and created whole resume creation and onboarding funtionality .

Personal Projects

Youtube Clone app (10/20/21)
(using React and youtube data v3 api) Source Code
Live Url : https://youtube-lyte.netlify.app/

Real Time chat application (10/20/21)
(Using Node js , socket io , Express , HTML , CSS)
Live Url :   https://chatapp-lyte.netlify.app/

Todo list - using pure javascript (07/2021)
Source Code : https://github.com/skntmax/toDoList
