📍 Noida

Objective

With a span of two years dedicated to web development, inclusive of an insightful internship with Internshala, I commenced my journey during the third year of my college tenure. During this period, I independently conceived and executed numerous projects, primarily utilizing Core PHP. Subsequently,

I pivoted towards MERN stack development, embarking on projects such as a Node.js-based chat application, a React.js-powered YouTube clone, and an efficient Content Management System. These projects were not only crafted meticulously but were also seamlessly deployed on cloud platforms.Following the successful culmination of my academic journey,

I embarked on a new chapter by joining Value Innovation Labs in November 2021, assuming the role of a Full Stack Developer. Based in Noida, this organization has provided me with a fertile ground to channel my skills. My tenure here has been marked by meaningful contributions to three government projects, wherein I crafted and implemented five to six vital modules. Impressively, these modules are not only operational but also actively contributing to the projects' success.

Noteworthy projects in my current portfolio include CCIL (Cement Corporation of India), EPIL (Engineering Enterprise Project), Rozgar.com (Naukri Portal), and the recently concluded FISCI (a comprehensive collegiate platform for streamlined student data management).In tandem with my professional endeavors, I have curated and nurtured my own blog, "skntmax.co.in," for the past two years. This self-driven initiative underscores my dedication and proficiency as a Full Stack Developer, a validation endorsed by both Internshala and LinkedIn. My aptitude extends to the domain of cybersecurity, as evidenced by my HackerRank certification in SQL.Motivated by an unwavering commitment to surmount new challenges, I am resolutely dedicated to harnessing my diversified skill set to tackle real-world issues effectively.

Education

CHHATRAPATI SHAHU JI MAHARAJ UNIVERSITY (CSJMU KANPUR)   Aug 2017 - Aug 2021
CSE/B.Tech
computer science and engineering

SWAMI HARSEWANAND PUBLIC SCHOOL (VARANASI)   July 205 - july 2016
12th
Science

Work Experience

VALUE INNOVATION LABS   2021 - Now
Noida
Full Stack developer (MERN)

Some Live Mini Projects

1. CONTACT - LIST (PERSITENCE REDUX)   2022 - 2022
https://react-demo44.netlify.app/contact
Using React/redux

2. TODO LIST (PERSITENCE REDUX)   2022 - 2022
https://react-demo44.netlify.app/todo-redux
Using React/reduxList

3. PERSONAL BLOG   2022 - 2022
https://react-demo44.netlify.app/blog
Using (React js , node-js , mongo-db , google drive)

Interests

I like singing, cricket and travelling ..

Skills

Language	**English, Hindi**
Programming Language	**javascript , c++, java , python ,**
Backend languages	**Node js , php**
Framework	**Next js , react Native , express js , flask api**
API	**Rest api**
Auth	**Auth0 (Google , linkedin , facebook , twitter etc...)**
Web Techonlogies :	**React-Js , HTML, CSS, Bootstrap, Material Ui, fluent UI, Reactstrap , Jquery ,Redux , react-query , react-virtualization**
Tam Work	**SEO , Negotiation and Teamwork**
Database	**Mysql , Mongo , Postgres**
AWS	**EC2 instances , s3 bucket**
Deployement	**Netlify and AWS , docker , Jenkins , Linux environment**
Operating System	**windows and Linux**
Programming Concepts	**Data structure and algorithms**

Enterprise Level Projects

1 (CCIL , **TECH STACK: React js , Node js , Postgres**   ) : it's a government experprise project known as cement cororation of India . bascailly it's an employee , file and leave management system of this own company . like file forwarding to multiple deparments at multiple level and getting approval by approving authority at the end , applying leave ,monitoting of leave , giving access of such several modules feature exists in this app .

In this project mainly i have worked on fixing bugs in file management and leave modules . apart from that i have created a **Committe Module** . where file will only be forwarded onl when untilll and unless all the committe members mark the file and give their own discription of that file . I have been working on this project about months .

2. (EPIL , TECH STACK: React js , Node js , Postgres) :   It's very similar to above project but modififed version of CCIL. generally known as Engineering Enterprise project . but it includedes some other modules with the old one . like E-**filing modules** , **Knowledge management module , DAK maagement** , **E-toor** , **Medical reimbursment** . which was totally intiated by me from scratch . And in this projects i have created **E-toor module** and **Medical reimbursment module . Knowledge management** . Apart from that and except

all that modules made by me i haved done fixing and enhancement , like in **E-filling , Leave module ,, Dak module as well** . Overall these all modules are currently in running state and used by government employees of EPIL . I have been working on this project since last 1.5 years .

3.(ROZGAR.COM , TECH STACK: Next js , Node js , Mysql): It's our own company's project very similar to naukari.com but have inluded some different feature .latest version is still not live due to developing stage . In this project i have done data migration of 70,000 jobs with fully mapped with category , role , industry , employeer id , location , job title from the older version of rozgar.com . which was previusly running in mongo db where as new one is runnning on mysql db . later we migrated this whole web app on next js for SEO purpose and site to be ranked on any serach engine easily. And later on build some other modules such as resume making , summary and cover letter generator using AI also integrated grammerly .

4.(HRMS , TECH STACK: React js , Node js , Postgres) :   it's also our own company's project bascailly a employee management system . where i have worked with **payroll module** .

5.(recruiter.rozgar.com and rozgar.com ,TECH STACK: Next js , Node js , Mysql) : Have integreated Zoom API in rozgar recruiter section and in candidate portal where interveiwer can take their candidate interview on their own plateform without any third party apps such as zoom or google meet .

Achievement

1. Digital marketing certification awarded by Google

2. Got 58.79% in TCS NQT exam

3. Runs a website called https://techymaxx.com

4. Hacker rank SQL certified

5. full stack developer certified by internshala

Personal Projects

1. Youtube Clone app (**using React and youtube data v3 api**)   10/2021
 Source Code : **https://github.com/skntmax/youtube_clone**

2. Real Time chat application (**Using Node js , handlebar template Engine , Mysql , Express , HTML , CSS**) Source Code : **https://github.com/skntmax/socket_app**   10/2021

3. Todo list (**using pure javascript**) Source Code : **https://github.com/skntmax/toDoList**   07/2021

4. mp3 music player (**using pure javascript**)   Source Code : **https://github.com/skntmax/music_player**   07/2021

5. Blog management system **(usng node js express mongo)** Source Code **: https://github.com/skntmax/blog**   09/2021

6. Employee managment system (**Using React js**)   Source Code : **https://github.com/skntmax/**   07/2021

7. tolet system (**Using Laravel**)   Source Code :   07/2021
https://github.com/skntmax/to-let

The main aim of this project was to solve the problem of bachelor or
for any person who is searching for rooms to stay at local level or you
can say in cheaper prices. Cause most of the these students come
from very pool family so that they are not able to pay such high price
rent for their survival. That's why I tried to build a system which is able
to solve not more but atleast some of problem in their life .
