Professional Summary

Senior Software Engineer with 5 years of experience building high-performance, scalable, cloud-native applications across Fintech and Enterprise domains. Strong expertise in Microservices Architecture, RESTful API Development, Event-Driven Systems, Distributed Systems, and Domain-Driven Design (DDD).

Hands-on experience with Java Spring Boot, Node.js, NestJS, Kafka, Redis, AWS Cloud, and Generative AI technologies. Experienced in integrating Large Language Models (LLMs), OpenAI APIs, AI Agents, Agentic Workflows, Prompt Engineering, Retrieval-Augmented Generation (RAG), and AI-powered automation into software products and developer workflows.

Proficient in System Design (HLD/LLD), API Gateway integrations, Database Optimization, Containerization (Docker, Kubernetes), CI/CD automation, Infrastructure as Code, Performance Engineering, and scalable backend architecture. Experienced in building highly available, fault-tolerant, secure systems with observability, monitoring, and logging practices.

Technical Skills

Programming Languages: Java, Python, JavaScript (ES6+), TypeScript, SQL

Observability & Performance: Logging, Monitoring, Performance Optimization, Caching, Rate Limiting

Concepts: DSA, OOP, SOLID, Design Patterns, System Design (HLD/LLD), Clean Architecture

Backend: Spring Boot, Node.js, NestJS, Express.js, REST APIs, GraphQL, Microservices

Frontend: React.js, Next.js, Redux Toolkit, React Query, Material UI

Databases: PostgreSQL, MySQL, MongoDB, Redis, Indexing, Query Optimization

Cloud & DevOps: AWS (EC2, S3, SQS, RDS), Docker, Kubernetes, Jenkins, GitHub Actions

Messaging: Apache Kafka, Event-Driven Architecture, Pub/Sub Systems

Architecture: Microservices, Distributed Systems, Scalability, High Availability

Security: JWT, OAuth2, RBAC, API Security

AI, Generative AI Automation: AI Agents, Agentic AI, Agentic Workflows, Retrieval-Augmented Generation (RAG), Prompt Engineering, Prompt Design, LLM Integration, OpenAI API, Function Calling, Tool Calling, AI API Integration, AI-Powered Applications, AI Automation, Workflow Automation, n8n, AI-Assisted Development

Professional Experience

Paytm, Noida

Jan 2025 – Present

Senior Software Engineer

- Designed scalable microservices ensuring High Availability and Fault Tolerance using Spring Boot and Kafka.
- Implemented API Gateway, Rate Limiting, and Load Balancing for secure and scalable request handling.
- Built distributed caching using Redis to reduce latency and improve performance.
- Applied Circuit Breaker patterns to improve system resilience under failure conditions.
- Optimized APIs and databases improving response time and throughput.

PolicyBazaar – PB Partners, Gurgaon

Apr 2024 – Jan 2025

Technical Associate

- Developed scalable backend systems using Nest.js microservices.
- Designed REST APIs with RBAC security and API Gateway integration.
- Built event-driven systems using Kafka for horizontal scalability.
- Improved database performance under high concurrency workloads.

Value Innovation Labs

Nov 2021 – Apr 2024

Full Stack Developer

- Built microservices handling 100K+ daily transactions with high reliability.
- Designed scalable systems with caching and optimized DB queries.
- Improved system stability and reduced production issues significantly.

Major Projects

Zamtel – Government Fintech Platform (Zambia)

Jan 2025 – Present

Tech Stack: React (TypeScript), Java Microservices, Node.js (BFF), Kubernetes

- Built a government-regulated fintech platform enabling digital payments similar to Paytm/PhonePe.
- Designed scalable Java-based microservices deployed on Kubernetes.
- Developed Node.js BFF layer handling encryption/decryption using symmetric and asymmetric cryptography.
- Implemented secure request-response lifecycle ensuring high throughput and reliability.
- Contributed to distributed system architecture for high availability and fault tolerance.

SwiftCab.in – Real-Time Cab Booking Platform

Jan 2025 – Present

Tech Stack: TypeScript, Kafka, Redis, PostgreSQL, Sockets, Golang

- Built real-time ride-hailing system similar to Ola/Rapido.
- Designed event-driven architecture using Kafka brokers for high scalability.
- Implemented real-time driver-user matching using WebSockets.
- Used Redis for caching and fast state management.
- Exploring Golang to scale performance-critical services.

office.ccilttd.in – Cement Corporation of India

Nov 2021 – April 2024

Tech Stack: React.js, Node.js, PostgreSQL

- Developed enterprise workflow system for employee file and leave management.
- Built multi-level approval system for inter-department file movement.
- Designed Committee Module enforcing mandatory multi-member approvals before file progression.
- Fixed critical production issues and improved system stability.

epieoffice.in – Engineering Projects India Limited

Nov 2021 – April 2024

Tech Stack: React.js, Node.js, PostgreSQL

- Enhanced CCIL system with advanced enterprise modules.
- Independently developed E-tour, Medical Reimbursement, and Knowledge Management modules.
- Contributed to E-filing, Leave, and DAK systems improving performance and usability.
- Delivered production-ready solutions actively used by government personnel.

Codexcave.com – Developer Learning & Practice Platform

April 2024 – Present

Tech Stack: React.js, Node.js, MongoDB, System Design

- Built a developer-focused platform for coding practice, interview preparation, and technical content delivery.
- Designed scalable backend APIs and structured problem modules for real-world interview scenarios.
- Implemented clean UI/UX for content consumption, improving user engagement and retention.
- Focused on performance optimization, SEO, and structured content delivery for better discoverability.

Rozgar.com – Job Portal Platform

Nov 2021 – April 2024

Tech Stack: Next.js, Java microservices, Node.js, MySQL

- Migrated 70,000+ job records from MongoDB to MySQL with structured data mapping.
- Rebuilt platform using Next.js improving SEO and search visibility.
- Developed AI-powered resume builder, summary generator, and cover letter generator.
- Integrated Grammarly for enhanced content quality.
- Developed **AI-powered resume builder, resume summary generator, and cover letter generator** using Generative AI, LLM integration, and AI APIs.
- Designed AI-assisted workflows for automated resume content generation, personalization, and job application content creation.
- Integrated Generative AI capabilities to improve content quality, personalization, and overall user experience.

Education

Chhatrapati Shahu Ji Maharaj University

B.Tech in Computer Science

2017 – 2021

Certifications

- **Full Stack Developer – Internshala [CN: 972670B8-3D5F-7E61-BD07-20E9DBCCCD22]**
- **Full Text Queries with Elasticsearch**
- **React JS for Beginners – Simplilearn**
- **SQL Certification – HackerRank**
- **Getting Started with NodeJS – SkillUp**
- **Introduction to Kubernetes**
- **Oracle Database PL/SQL Developer Certified Professional : [CN :63f0d0bd484f]**
- **React js Frontend developer by Hackerrank**

- Full Stack JavaScript Development (MongoDB, Node)
- React Native Essential Training
- Introduction to Cloud Computing
- AWS Cloud Essentials
- JavaScript Intermediate Certification
